- Space Heating
- Tubular Heating
- Fan Convectors
- Plaque Heating
- Safety Checks & Certification
- Design & Installation Service
- Testing & Purging of Gas Pipe Work
- Preventative Maintenance Agreements
- Next Day attendance to call outs

It is imperative that all commercial and industrial gas fired heating equipment is regularly maintained and certified safe by a component Gas Safe registered gas engineer.

The Gas Safety (installations and Use) Regulations 1998 state *"It shall be the duty of every employer or self employed person to ensure that any gas appliance, installation pipework or flue installed at any place of work under his control is maintained in a safe condition so as to prevent risk of injury to any person"*.
